امتحان استرشادي الصف الرابع الابتدائي

Question (1):

A-choose the correct answer:

- 1- In a battery of a toy car, energy is changed in to electrical energy.
(thermal – chemical – sound – light)
- 2- Electric wires are made up of material.
(plastic – wood – iron – copper)
- 3- The weathering is a change in structure of rock.
(physical – chemical – mechanical – electrical)
- 4- Delta is formed by process.
(chemical weathering – mechanical weathering – erosion – deposition)

b- write the scientific term:

- The process of moving the sediments from one place to another.

Question (2):

A-Complete the following sentence:

- 1- The main source of energy on the Earth's surface is
 - 2- The energy is produced by burning fuel.
 - 3- A canyon may take many to be formed.
 - 4- The sedimentary rocks is formed of

B – Give reasons for:

- The Earth's surface is always changing.

Question (3):

A-Put (✓) or (✗);

- 1- Electric bulb changes the electrical energy in to kinetic energy.** ()

2- Smog damages the respiratory system. ()

3- Oxygen can rust rocks. ()

4- Breaking a piece of biscuit by hand is similar to erosion of rocks. ()

B – What happens if:

- Acid rain falls on rocks?

Question (1) :(5 marks)

A-choose the correct answer : (4 marks)

- 1- In a battery of a toy car, energy is changed in to electrical energy.
(thermal – **chemical** – sound – light)
- 2- Electric wires are made up of material.
(plastic – wood – iron – **copper**)
- 3- Theweathering is a change in structure of rock.
(physical – **chemical** – mechanical – electrical)
- 4- Delta is formed byprocess.
(chemical weathering – mechanical weathering – erosion – **deposition**)

b- write the scientific term :(1 mark)

- The process of moving the sediments from one place to another.

(Erosion)

Question (2) : (5 marks)

A-Complete the following sentence : (4 marks)

- 1- The main source of energy on the Earth's surface is sun .
 - 2- The thermal energy is produced by burning fuel.
 - 3- A canyon may take many years to be formed.
 - 4- The sedimentary rocks is formed of many layers of sediments .

B – Give reasons for : (1 mark)

- The Earth's surface is always changing.

Due to the process weathering , erosion and deposition.

Question (3) : (5 marks)

A-Put (✓) or (✗): (4 marks)

- 1- Electric bulb changes the electrical energy in to kinetic energy. ✗
 - 2- Smog damages the respiratory system. ✓
 - 3- Oxygen can rust rocks. ✓
 - 4- Breaking a piece of biscuit by hand is similar to erosion of rocks.

B –What happens if :

- Acid rain falls on rocks ?

Causing the breakdown of rocks
